

HOME ACCENTS

By Victoria Namkung

Ready to redo those ancient kitchen cabinets? Or perhaps it's time to convert a boring home office into a proper library? Those in the know call on Gabriel McKeagney and his team at Tempo Carpentry & Design Inc., to create artistic and architecturally pure woodwork. Regarded among homeowners and builders alike for the uniqueness, authenticity and originality of their designs. Tempo's artisans and woodcarvers

create everything from detailed handrails for sweeping staircases to home theaters. Lately, Tempo is doing a lot of wine cellars in the area, complete with an innovative racking and numbering system to make cataloging that prized collection a breeze. "It's a marvelous integration of traditional woodwork and the latest technology," McKeagney says. "Wine epicureans can even scan the wine bottle's bar code as they unpack their crates and give each bottle its position using their touch screen."
