TCD Crafts Exotic and Playful Cabana Furniture

Two years after crafting a spiral bamboo weave ceiling in this exclusive home cabana in Laguna Beach, CA, the new homeowners commissioned Tempo Carpentry & Design to design complementary furniture for their exotic and playful home getaway.

Cabana Cabinet

The solid maple cabana cabinet harmonizes with the room's tropical bungalow atmosphere. The cabinet's beauty lies in its distinctive veneer work: a sensuous curly maple veneer runs vertically on the cabinet's upper doors and horizontally on the lower drawers, while the side edging, feet, and crown boast a rich maple burl veneer. TCD craftsman meticulously shaped the unique handles from solid maple burl.

Cabana Plasma Surround

TCD's artisans surrounded the cabana's plasma TV with a hand-carved bamboo weave pattern frame that seamlessly blends with the room's island decor. A cylindrical solid bamboo stalk covers the plasma's unsightly metal rod, and is topped with a tropical leaf ceiling medallion, crisply hand-carved from solid bamboo.

Working with interior designer Jami D. Martin, of JD Martin Designs, this luxurious home cabana represents outstanding contemporary beach house design.
