The *Fifth Wall* - Hardwood Ceilings

Thoughtful homeowners are looking up to the space over their heads and envisioning the latest trend in interior design. Emulating the ornate ceilings found in the finest chateaus in Europe, Tempo Carpentry & Design is crafting hardwood ceilings that complement the distinctive aesthetics found in southern Californian homes.

Using a unique lumber core material that brings out the charming character of wood, the handcrafted ceiling becomes the "fifth wall" to a room dedicated to art and architecture.

TCD has developed a range of beautiful hardwood ceiling panels that offer innovative solutions to complex design problems. Choose from our existing line of distinctive panels or create your own. And to alleviate headaches across the board, our full-scale CAD drawings integrate acoustical, electrical, HVAC, and sprinkler positioning.

Creating handcrafted decorative ceilings is a natural step for the award-winning woodworking company that has been nationally recognized for antique furniture reproduction.
