OLD WORLD ARCHITECTURE MEETS HIGH TECH ENTERTAINMENT

Tempo Carpentry & Design, Inc. designed and fabricated this exceptional Spanish Old World Entertainment Center for an admirer of the Spanish/Mexican aesthetic. Our client was unable to find antique doors that provided Old World character and could still work smoothly with modern hardware.

TCD fashioned this entertainment center in solid bamboo with large, hand-carved pocket doors, designed to look like Spanish Old World exterior

doors, with a carved surround that preserves traditional Spanish/Mexican architecture. The finished doors are skillfully distressed in a medium mahogany stain with subtle green and gold undertones, and are highlighted with burnished gold medallions on the circular centers.

The Entertainment Center's interior features an inventive and attractive Moroccan speaker grill that is porous to allow for sound and ventilation, and is backed with speaker cloth to conceal unsightly AV equipment and wires.

TCD has produced an architecturally pure and fully functional design solution, providing an Old World look that accommodates state-of-the-art AV equipment.

Please let us know how we might be able to similarly serve your distinctive hardwood design needs.
