Tempo Carpentry & Design Wins “Best in Show” for Outstanding Wine Cellar

National trade magazine *Custom Woodworking Business* awarded Tempo Carpentry & Design, Inc. top honors in their 2007 Design Portfolio Awards for TCD's innovative furniture-grade wine cellar cabinetry and racking. "For centuries, wine collecting has been considered an art, and now, wine display has become one," explains Gabriel McKeagney, TCD's president.

Each section of this wine cellar stands alone as an individual, architecturally stimulating piece of furniture. The cellar features unique curved corner shelving with grooves for each wine bottle. The functional drawer fronts are fabricated from authentic wine crating. Attractive grills seamlessly integrate the unsightly ventilation system.

Most impressively, sequential numbering over each bottle position allows connoisseurs to easily track bottles on wine cataloging software. Each opening possesses its own number so that each bottle can be specifically inventoried, retrieved, and replaced.

TCD also won an Honorable Mention for its stunning Louis XV Fireplace, hand-carved in rare English walnut. Characterized by tasteful and realistic high relief in carving, the fireplace features contoured and flowing floral arrangements, musical instruments, and period French imagery.
